### POST-OPERATIVE NOTE

January 31, 2020

Michael Y. Jacobi, D.O.  
218-08 Hempstead Ave, 2nd Fl.  
Queens Village, NY 11429

Re: Abdel Richardson  
DOB: 09/14/1958

Dear Dr. Jacobi:

The patient is status post right shoulder arthroscopic surgery on 01/23/2020. He comes today for postoperative followup. The patient is doing well.

Today, upon evaluation, the surgical site is well healed. The dressing was removed. There is no evidence of any drainage, redness or discharge from the surgical site. There is no swelling. The patient is afebrile. He is satisfied with the results of the surgery. He has regained almost full mobility of the right shoulder. He has minimal pain.

The patient was advised to continue with physical therapy 3 times a week for 6 weeks to regain full mobility of the right shoulder.

The patient was instructed to call my office if there are any problems in the future. Otherwise, the patient is discharged from my care.

ANJANI SINHA, M.D., M.S.
