SPECIAL INSTRUCTIONS

MEDICAL NECESSITY REASONING:

I am prescribing CPM (Continuous Passive Motion) that will help my patient during the post-operative recovery by increasing range of motion, preventing the development of motion-limiting adhesions, decreasing soft tissue stiffness and stimulating healing of joint surfaces and soft tissues. Moreover, the prescribed CPM Device will involve movement of the joints without active contraction of muscle groups and without patient effort, in view of the fact that, active movement that might destabilize the recovery and, also cause a painful process. Inasmuch, using CPM Device, my patient will experience less pain, recover faster, and, consequently there will be less pain medication and physical therapy required.

SPECIAL INSTRUCTIONS

MEDICAL NECESSITY REASONING:

I am prescribing Cold Therapy Circulating Pump/GR, as this device is medically necessary and reasonable in reference to my patient's post-operative recovery. This pneumatic cold compression therapy system will provide my patient adjustable cold and intermittent compression. Insofar as it is a proven and effective technique in post-operative recovery. Respectively, the Cold Therapy Unit will productively reduce recovery time as well as reducing swelling, edema and pain. By delivering comprehensive, flexible, and proven treatment of swelling, edema, pain or/and other post-surgical or injury conditions, I consider that my patient's rehabilitation process will be highly alleviated.
